College of Agriculture and Biological Sciences
South Dakota State University

INTRODUCTION

This bulletin includes population and housing information concerning the school districts in South Dakota. Data for this bulletin was taken from the Census of Population and Housing, 1980: Summary Tape File 1F, School Districts.

Table 1 includes POPULATION INFORMATION for the school districts in South Dakota. Columns 1 and 2 list the total population and the rural population in each of the school districts. Columns 3 and 4 respectively list the number of families and households by school district. Columns 5 through 8 include the number of HOUSEHODS with one or more children under eighteen years of age by household type. Columns 9 through 15 list the number of PERSONS under eighteen years of age by household type.

Table 2 lists the number of persons in South Dakota school districts by AGE CATEGORIES. Note that the numbers are based on 1980 census data. To estimate the number of persons in an age category as of a date later than 1980, subtract 1980 from the year in question. The difference between these two years may then be added to each of the age category headings of Columns 1 through 15. The new numbers would indicate the number of persons by age category for the year in question. Collapsing of age categories by the U.S. Census Bureau prevents being able to print year-by-year data. Columns 16 through 18 list the median age by sex for persons in the various school districts.

Table 3 includes HOUSING INFORMATION for school districts in South Dakota. Columns 1 through 4 respectively list the total number of houses and the number of occupied, vacant, and renter-occupied houses in the school district. Columns 5 through 17 list the number of houses by house value. Column 18 lists the median value of houses in the various school districts.

DEFINITIONS

A "family" is defined as two or more persons, including the householder, who are related by birth, marriage, or adoption and who live together as one household. A person maintaining a household alone, or with unrelated persons only, is regarded as a household but not as a family. Thus, some households do not contain a family.

A "household" is defined as the person or persons occupying a housing unit.

"Rural" is defined as open country, farmsteads, and communities with a population of less than 2,500 people.

ACKNOWLEDGEMENTS

The technical advice of Warren G. Hovland and the clerical assistance of Donna M Thuringer in the preparation of the bulletin are gratefully acknowledged.
